DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Sohraby (US 6,192,049).

Sohraby discloses a switching fabric comprising the following features: in Fig. 2, input ports I1, I2, IN for receiving data packets; a plurality of buffers CBR1,...CBRn corresponding to the input ports for queuing data packets; output port processor 230 for receiving the data from the buffers in successive time slots to identify the output for each data packet, and dynamically allocating time slots to one of the buffer according to the associated bandwidth.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hayter et al. (US 5,577,035) discloses an apparatus of processing bandwidth requirement.

Eng et al. (US 5,255,265) discloses a controller for input queue packet switch.

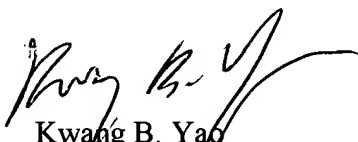

Grimble et al. (US 5,241,536) discloses a broadcast input buffered ATM switch.
